Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention: Applicant must first elect a species from group I and then, if appropriate, choose a species from group II.

Group I:

- Species A: a shoe bracket having a plurality of teeth and a lock plate having a plurality of teeth (claim 1).
- Species B: a shoe bracket having a plurality of teeth and a lock plate having a plurality of grooves (claim 11).
- Species C: a shoe bracket having a plurality of grooves and a lock plate having a plurality of teeth (claim 19).
- Species D: a shoe bracket having a plurality of interface protrusions and a lock plate (claim 27).
- Species E: a shoe bracket and a lock plate having a plurality of interface protrusions (claim 35).
- Species F: a shoe bracket having a friction interface and a lock plate having a friction interface (claim 43).

It is noted that the last line of paragraph [0016] of the specification clearly discloses each type of locking method a separate structure.

Group II (only if Species A is chosen):

Art Unit: 3724

- Species AA: the shoe bracket includes teeth spaced substantially twice as far apart as the plurality of teeth of the lock plate (claim 8).
- Species AB: the lock plate includes teeth spaced substantially twice as far apart as the plurality of teeth of the shoe bracket (claim 9).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, some claims may be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason Prone whose telephone number is (571) 272-4513. The examiner can normally be reached on 7:30-5:00, Mon - (every other) Fri.
